Flex-c-ment Concrete Flooring design, Colored and Polished Concrete Flooring and Vertical Overlay Systems have been used in the USA and Canada for about 30 years. The system is also exported to Europe, Asia, Australia and the Middle East. With it's flexibility and workability, it offers great solutions for resurfacing in natural Stone forms and brick faces.

DBS ltd , the Cement Based Product Manufacturer conducts hands-on training seminars on a monthly basis for potential installers or distributors of Flex-c-ment systems. In these seminars, attendees learn plastering, stamping and coloring techniques. The announcements of our trainings are posted on our website.
